Course Title: Cloud Native DevOps and Kubernetes Orchestration
Category: DevOps
Level: Intermediate to Advanced
Duration: 50 hours
Course Description:
A production-grade curriculum preparing cloud engineers for containerized workflows, CI/CD pipelines, and microservices.
Learning Objectives:
- Deploy containerized workloads with Docker and Kubernetes
- Implement GitOps deployment strategies with ArgoCD
- Monitor distributed microservices with Prometheus and Grafana
Prerequisites:
- Basic Linux CLI familiarity
Module 1: Container Foundations with Docker
Lesson 1: Multi-stage Docker Builds
Format: TEXT
Duration: 20 mins
Lesson 2: Docker Networking and Volume Mounts
Format: CODE
Duration: 30 mins
Module 2: Kubernetes Cluster Architecture
Lesson 1: Pods, Deployments and ReplicaSets
Format: TEXT
Duration: 25 mins
Lesson 2: Ingress Controllers and Services
Format: CODE
Duration: 35 mins
